

Remarks:

This reply is responsive to the *Ex Parte Quayle* Action dated October 9, 2007. Applicants thank the Examiner for the courtesies extended to the undersigned during the telephonic interview on December 6, 2007. As discussed during the interview and as will be explained in more detail below, Applicants submit that no changes to the claims or the drawings are necessary in response the *Ex Parte Quayle* Action. In light of these remarks, Applicants request that a Notice of Allowance be issued in due course.

Claim Objections

The Action objects to Claims 1, 46, 53, 89, and 92 by asserting that the recitation “the antenna structure” lacks antecedent basis. As discussed during the interview, Applicants disagree with this assertion. In each of Claims 1, 46, 53, 89, and 92, the recitation “the antenna structure” refers to the preceding recitation “an antenna structure.”

Drawings

Additionally, the Action objects to the drawings under 37 CFR 1.83(a), which requires, in part, that the drawings show every feature of the invention specified in the claims. Specifically, the Action asserts that the recitation “the RFID tag module is ... in a non-contacting coupled arrangement with ... the antenna structure of the RFID tag or label” is not shown in the drawings. Applicants disagree with this assertion and submit that this claim recitation is shown in at least two of the drawings. For example, Figs. 8 and 9 show an RFID module **300** that is in non-contacting coupled arrangement with antenna **310, 318**.

Accordingly, Applicants submit that the objections the claims and the objections to the drawings have been traversed.
